Recruitment timelines

The recruitment phase of EULAST is closed and we have a total of 536 patients enrolled. Thank you all for your contribution to this.

Baseline visits (V4)

The amount of baseline visits we currently have is **365**. That is 3 more than our target of **362** already. There are 10 more patients currently between randomization and baseline so this number of 365 will even go up.

536!

patients enrolled

Focus is now on **data completeness** in CRF and preparing Close Out Visits

Clinical Trial Center website with updates about all our research and published papers:
www.clinicaltrialcenter.nl

Also check us out on LinkedIn:

Data Completeness

With the recruitment being closed, we now enter the next phase of the study and data completeness will be our focus. We kindly request all of you to enter your data in TrialMaster **as soon as possible** after the patient visit. This allows your CRA to check the data remotely and create queries where needed. Also it's very important for us to know **when a patient is ACD**. This is important for two reasons:

1. We can monitor our medication stock accurately and only buy medication that is really needed. This is important for financial reasons.
2. We can plan our Close Out Visits as soon as possible when there are no patients in follow-up anymore at your site.

Data Completeness Naturalistic Follow Up

For each patient in the naturalistic follow-up part of the study there is a specific form to be entered when the last data has been entered. This form is called the '**End of Study** form'. This page is often forgotten to be entered. This is a kind reminder for all sites with naturalistic follow-up patients to complete this page.

Study Medication Expiry

Please note that the following medication will expire soon:

Medication	Lot number	Expiration date
Aripiprazole 5 mg	2512405	Feb 2019
Aripiprazole 10 mg	2511501	Feb 2019
Aripiprazole 15 mg	2509919	Feb 2019
Invega 6mg	HCZT800	Feb 2019
Xeplion 25 mg	HCB4V01	Feb 2019
Xeplion 50 mg	HCB4W00	Feb 2019

Please make sure that this medication is not used after the expiration date.

Close Out Visits

When you have no more patients in follow-up for the EULAST main study and in the Naturalistic Follow-Up part of the study, we will plan a Close Out Visit at your site. Next to the before mentioned data completeness in TrialMaster, it's very important that all the monitoring issues are resolved. Your CRA will guide you through this process.
